

## Portico

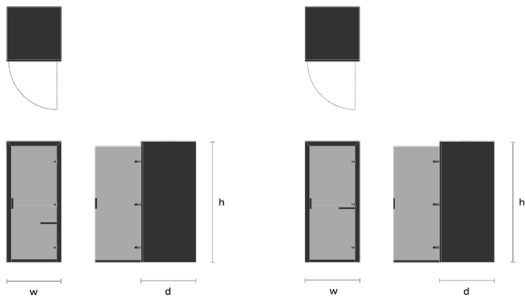

### Product Overview

Portico, is a Spacestor pod benefiting from continual development and years of research, designed with seamless simplicity for focused, private working. Featuring PIR-activated lighting and optimized ventilation, the pod provides all the essentials for focused working. Built-in power comes as standard, keeping your devices charged and productivity uninterrupted. With level access for inclusivity, the Portico ensures accessibility for all. The sleek glass door enhances its modern aesthetic while delivering advanced acoustic protection, ensuring speech privacy and a quiet workspace. Portico combines the essentials you need into one space-efficient pod.

### Dimensions

External: 88”h x 40”w x 40”d (mm)

Internal: 84”h x 33¼w x 36”w (mm)

### Environmental Summary

During the development journey we always kept our environmental impact in mind. This is demonstrated in the following key features of the design when the pod is purchased with the recommended finishes:

- All materials used are LBC 3.1 Red List Compliant, an extremely stringent standard
- Patented PVC-free acoustic door seal
- Product lifecycle – the products are designed to be modular and reconfigurable to cater for future needs without wastage and using more resources.
- Power usage – the products are designed with minimum idle power usage, with a PIR movement sensor to switch off the lighting after a period of non-use.
- FSC certified lumber.

### Environmental Document

### Electrics

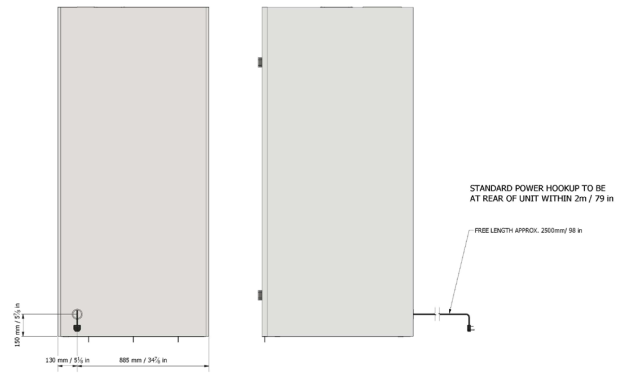

#### Lighting & Power

2x PIR controlled lights and 1x User power socket (US / UK)

#### Ventilation

A fixed speed fan feeds air through ceiling vents into pod.

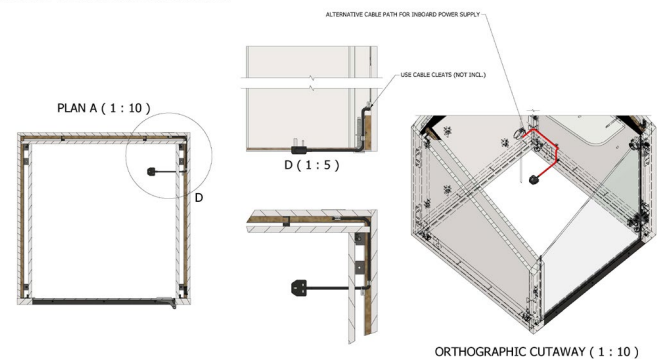

### Hardware Electrical Connection & Plug and Play Electrical Schematic:

UP TO 3 UNITS CAN BE SUPPLIED FROM ONE LOCATION. AS DETAILED BELOW.

ALTERNATIVE POWER HOOKUP CAN BE WITHIN BOOTH. CABLE ROUTE TO BE MODIFIED AND SECURED AS DETAILED.

### Safety

#### Weight Limits

Desk holds up to 132 lb

#### Lifting

Product must be handled by 2 operatives.

#### General safety

All maintenance and repair tasks must be performed by appropriately qualified and authorised technicians.

Only use tools that are appropriate for these tasks.

For longer periods of absence or if there is a thunderstorm, unplug the power supply cable from the power outlet to avoid damage due to grid-related over-voltage.

#### Structural

- Adjustable levellers on the product have up to 9/16” / 15mm tolerance

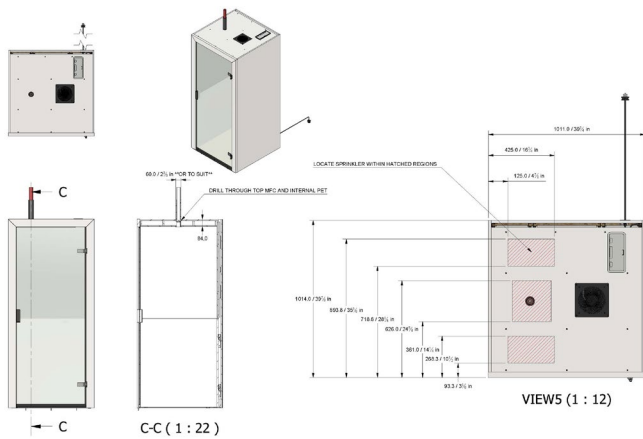

## Product Name

### Sprinkler

To address the need for any required fire sprinkler regulations, this product can accept a sprinkler head drop from the building fire sprinkler system via a cut out, managed per project with the Project Manager. A flexible fire sprinkler drop is recommended.

How high are the adjustable feet?

Adjustable feet up to 0.59", foam seal expands to close gap.

### Acoustics

#### Rating

The acoustic rating for this pod is -24db.

### Shipping

#### Shipping Dimensions

Length: 89"

Width: 39"

Height: 16"

#### Weight

518 lb

#### Packaging

Delivered flat pack in cardboard boxes, on 1 pallet.
